

**DOES
EXACTLY
WHAT IT
SAYS ON
THE TIN™**

Ronseal Promise, if you do exactly what it says on the tin, this product will do exactly what it says on the tin.

- Restores decking back to its natural colour in just 15 minutes
- Quick and easy to use gel formulation
- Fast acting, non-acidic formula is safe for use around both plants and lawns
- No pre-treatment with any other cleaning product required
- Low odour formulation
- Easy clean up – brushes simply wash out in water
- Once restored, decking can be protected using any Ronseal decking finish

What is Ronseal Decking Restorer?

Ronseal Decking Restorer is the quick and easy way to safely restore grey or weathered decking back to its natural appearance with the minimum effort and fuss. The unique non-acidic, gel formulation will brighten and revive dull and weathered timbers to leave your deck looking clean, newly restored and transformed to its original colour.

Where should it be used?

Ronseal Decking Restorer can be used on any type of decking timber.

PREPARATION

Remove any debris and accumulations of moss, mould and algae using a stiff brush. Ensure the surface is bare and that all previous coatings are completely removed prior to application. Always test an inconspicuous area before starting general application to ensure the desired result is achieved.

APPLICATION

1. Stir well before use. Liberally apply Ronseal Decking Restorer by brush. Work on a manageable area i.e. 3 or 4 decking boards at a time.
2. Work the Decking Restorer into the surface of the deck by thoroughly scrubbing with a stiff bristle brush.
3. Allow to work for 15 minutes and then re-scrub before rinsing off with clean water. For best results, rinse using a pressure washer, working down the full length of the boards or alternatively use a garden hose. Ensure all residues are completely rinsed away.

4. One application will normally be sufficient, however, in cases of severe weathering a second application may be required.
5. Allow at least 2 days for decking to thoroughly dry out before the application of any protective coatings.

To prolong the appearance of your newly restored deck and to provide long lasting protection, choose from Ronseal Decking Oil, Stain, Seal or Protector.

COVERAGE

2.5L is sufficient to treat a deck 20 to 25 square metres.

CLEAN UP

Remove as much product as possible from application equipment before cleaning. All equipment should be cleaned using plenty of water and detergent. Some local authorities have special facilities for the disposal of waste products. Do not empty undiluted product in to drains or watercourses.

MAINTENANCE

Decking should be inspected on an annual basis. Protection with a Ronseal decking finish will help maintain the appearance of your deck, as will treatment with Ronseal Decking Cleaner. Clean and/or retreat your decking as appropriate.

RONSEAL DECKING RESTORER

Avoid contact with skin and eyes. In case of contact with eyes rinse immediately with plenty of water and seek medical advice. Use only in well ventilated areas. Keep out of the reach of children. Protect from frost. To avoid the risk of spillage always store and transport in a secure and upright position.
