RONSEAL'S HARDEST EVER FLOOR VARNISH

EASIEST EVER APPLICATION

THE PERFECT FINISH

Ronseal Diamond Hard Floor Varnish

- Ultimate protection for valued wooden floors.
- Advanced polyurethane formulation provides an exceptionally hard wearing, long lasting finish.
- Maximum durability - resists abrasion, knocks, scratches and scuffs.
- Specially formulated to offer premium protection from household chemical spillage.
- Beautiful, clear, non-yellowing finish.

Ronseal Perfect Finish Floor Pad

- Applies optimum film thickness to ensure ultimate protection.
- Unique foam-flock combination delivers a smooth, even application for a Perfect Finish.
- Thick foam ensures the pad remains in constant contact with the floor.
- Reaches right up to skirting boards - no need for a brush.
- Long, smooth strokes mean no brush marks.

Ronseal Perfect Finish Diamond Hard Floor

Varnish combines the ultimate protection of Ronseal's Diamond Hard Floor Varnish with the ultimate application method of the Ronseal Perfect Finish Floor Pad. Together they deliver outstanding protection to valued wooden floors with a beautiful, smooth Perfect Finish.

RONSEAL PERFECT FINISH DIAMOND HARD CLEAR FLOOR VARNISH

Keep out of the reach of children. Avoid contact with skin and eyes. After contact with skin, wash immediately with plenty of water. In case of contact with eyes, rinse immediately with plenty of water and seek medical advice. Use only in well-ventilated areas. Protect from frost - do not apply below 10°C or in high humidity. To avoid the risk of spillage, always store and transport in a secure and upright position.

WHERE CAN I USE IT?

It is ideal for use on most wooden floors including those in kitchens and bathrooms and is particularly suited for areas of the highest foot traffic. Suitable for use over most hard and softwoods, as well as hardboard, chipboard and wood composite. Not to be used over laminate floors or over painted surfaces.

WHAT SORT OF FINISH?

Ronseal Perfect Finish Diamond Hard Clear Floor Varnish is available in Gloss or Satin finishes which allow the natural beauty of the wood to show through without yellowing over time. If you wish to colour your floor use Ronseal Diamond Hard Coloured Floor Varnish.

HOW MANY COATS?

We advise 2 coats are applied to varnished wood. Untreated wood will need 3 coats to ensure maximum durability. If required further coats may be applied leaving 2 hours between each coat.

COVERAGE

2.5 litres is normally sufficient to cover 40-50 square metres per coat. This tin should provide enough for 3 coats on a floor measuring 3 metres by 5 metres. Coverage varies with the absorbency of wood. To cover a floor of this size using the Perfect Finish Floor Pad will take approximately 20-30 minutes per coat.

PREPARATION

Previously varnished and bare floors should be thoroughly sanded with 120 grade abrasive paper to provide a key for the varnish to adhere to. Wipe over with white spirit to remove dust and allow to dry. Varnish in poor condition and all other existing coatings must be completely removed and the surface sanded back to a smooth finish. The quickest option is to hire a sanding machine from a tool hire shop. Follow the hire instructions, always test sanding, remembering to sand along the grain. Use a small electric sander or sand by hand to finish off around the edges. Do not use an abrasive paper finer than 120 grade. Fill any holes or surface imperfections with Ronseal Multi Purpose Wood Filler. Allow dust to settle then vacuum. Wipe over with white spirit and allow to dry thoroughly. Avoid inhalation of dust, wear a suitable face mask when sanding.

APPLICATION

1. Remove overcap and assemble the Perfect Finish Floor Pad, see instructions in pack. Stir the varnish thoroughly before and during use. Apply in a warm, well-ventilated room.
2. Dip the pad evenly into the varnish, ensuring only the flock is covered, leaving the foam dry.
3. Starting in the corner of the room furthest from the door, pull the Perfect Finish Floor Pad towards you in the direction of the woodgrain. Never push the Floor Pad away from you. The Perfect Finish Floor Pad holds more varnish than a brush so you will be able to apply the Floor Varnish in long smooth strokes before reloading.
4. When you get near to the other side of the room turn the Perfect Finish Floor Pad around and apply from the other end, feathering in to meet coated areas. Repeat this process working along 2 floorboards at a time.
5. Apply 2/3 coats, allowing 2 hours between coats.
6. Before the final coat, lightly rub down with 240 grade abrasive paper and wipe over with a damp cloth and allow to dry thoroughly. Do not use wire wool. The floor is ready to walk on after 8 hours but allow 72 hours before subjecting to general traffic. If additional varnish is required, Ronseal Diamond Hard Floor Varnish is also available in 750ml & 2.5 litre tins.

CLEAN UP

Remove as much varnish as possible from the pad before cleaning. Clean pad whilst wet with water and detergent. Always leave the pad to dry with the flock facing upwards. Some local authorities have special facilities for disposing of waste coatings. Do not empty into drains or watercourses.

IMPORTANT

Always test on a small area first. Use product only as directed. Apply in accordance with the coverage guidelines otherwise product performance will be reduced. Poor ventilation, low temperatures and high humidity will lengthen dry times. Do not cover with carpets or rugs for 8 days, protect from water for 5 days.

EU limit value for this product
(cat A/I): 140 g/l (2007)/140g/l (2010).
This product contains max 95 g/l VOC.
